LUNA-II YF™
Software Update manual v1.0

IMPORTANT

• Do not put multiple software files on the USB drive at once.
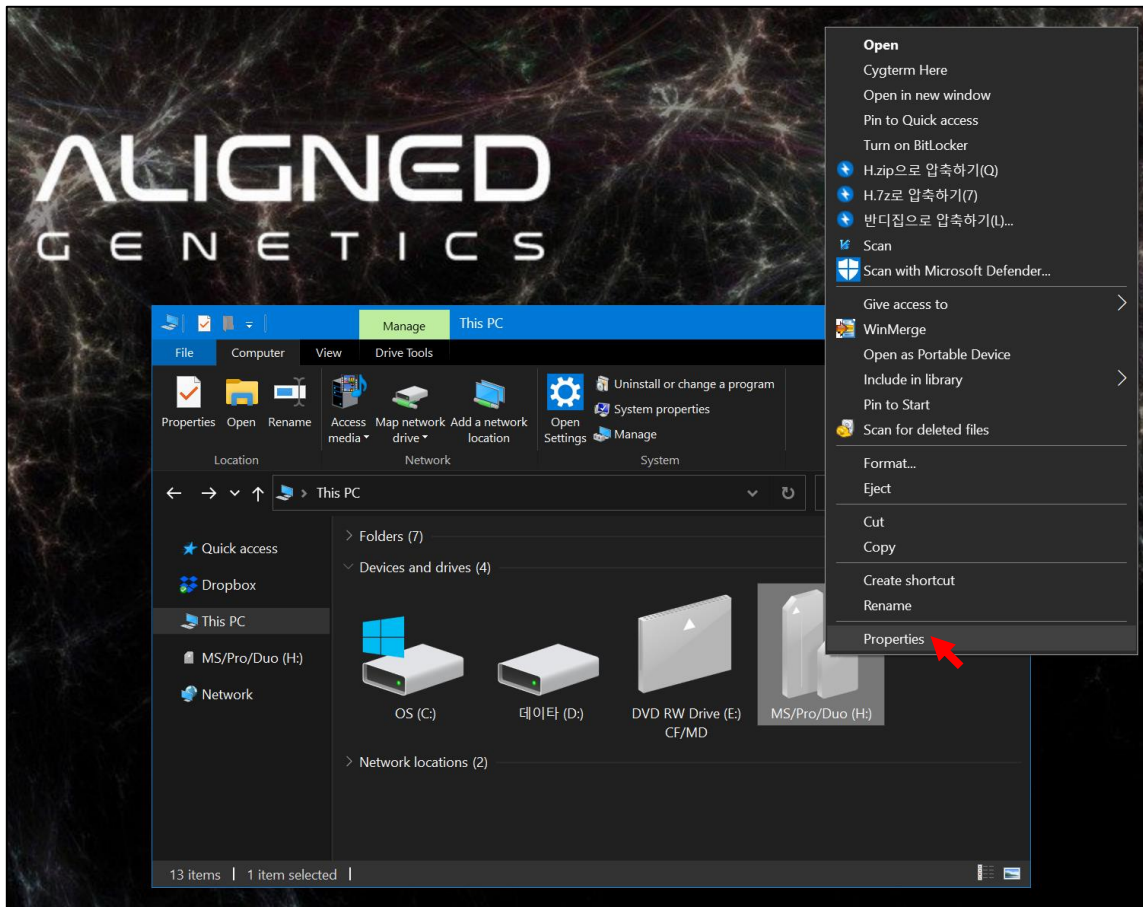

• Save only one software file to use then update.

WARNING

• Because software update is potentially risky, if you do not encounter problems using the current version of software, it is recommended that you not update the software. To flash the software, do it with caution. Inadequate software update may result in system malfunction. Be sure to read the Release Notes before updating the software.

#1. For software not available on website, contact techsupport@alignedgenetics.com
#2. IQOQ software requires a separate update file. Please contact techsupport@alignedgenetics.com with a photo of the software version and serial number.

❖ **Prepare a USB memory in FAT32 format**

- **How to check**
  If "USB – Properties – File System: FAT32", go to page 4.
